WORK EXPERIENCE

Searce Inc, Bangalore | Senior Software Engineer

October 2025 - Present

1. Backend Developer, Fraser and Neave, Singapore

Worked on migrating the organisation's Backend systems from AWS EC2 to GCP managed services. Worked on modernizing Java Servlet code to Springboot. Addressed various problems stated by the client and optimizing the systems to improve the performance by 50%. Worked on making the Application / Web Layer to be stateless to support scalability. Made use of GCP's managed services to efficiently design a system well catering the business needs.

Tech Stack: **Java, Springboot, PostgreSQL, Oracle DB, GCP**

Searce Inc, Bangalore | Software Engineer

July 2022 - Oct 2025 | 3 years

2. Developer, ONDC (Open Network for Digital Commerce)

The role involved innovating architectural changes to the product to meet the increasing request load, introducing new features, fixing bugs in existing production environments and providing L3 (Level 3) support for the product. Built various internal tools like data migration scripts, mock data generation scripts, Encryption utilities that would help the L1/L2 teams to automate tasks.

Worked closely with testing and devops teams to ensure seamless deployments to production without any hassles. Worked along with L1/L2 teams 24/7 to solve the issues of the customers.

Tech Stack: **Java, Springboot, NodeJS, PostgreSQL, GCP**

3. Backend Developer, Globe Telecom, Philippines

Globe is a Telecommunications provider based in the Philippines. The role involved building a microsite for enabling customers in
